Hi Eleanor,

I am attaching the full Preliminary application for the Historical Preservation for the Islander. I also just emailed it to you to esign. All the pages are there as well, but I thought that I'd send it in a separate file so that you can save, print, etc.

Lets talk after you have a chance to review it.

Again, sorry for the delay. Things always take so much longer than you expect them to.

Enjoy your evening.

Lisa

Subject: Fwd: Islander Historical Preservation

Board and Christie -

Lisa Joaquin has put together this remarkable document seeking historical significance recognition for The Islander. She has spoken to the Pinellas Historical Preservation planner - Tom Scofield - and he encouraged her to fill out the application.

It needs a signature from a Board member (see "owner" line) so I send it for your approval.

It is a lovely tribute - brought me to tears!

Eleanor

Hi Eleanor,

Heres the updated Historical Preservation Package. I made the few changes that we discussed.

Also on another note I wanted to let you know I had a nice conversation with Dr Kyra Lucas who is the supervisor of the bureau of historic preservation for the Florida department of State and while we were on the phone I emailed her the package. She reviewed it and she is presenting it to her team on Monday so we will have an answer on Monday or Tuesday whether they feel that the Islander is eligible for full review. If they have additional questions they will let us know.

She did ask if we knew when the peaks on the buildings were added and then removed. According to the photos that I have from 1964 they're not on the original buildings when they were built but if you look at the package and you look at the brochure from 1983, it shows the peaks on the west side of the buildings and in the following page where it shows the second brochure you see the peaks in the pictures they wanted to know when those were removed. So if you or anybody else knows that would be great.

And any other pertinent information like changes that were made to the buildings or anything that would be great too.

Staying hopeful.

Lisa
